ORDER

APPLICATION 12885

PERMIT 7656

LICENSE 4479

ORDER CORRECTING THE DESCRIPTION OF THE
POINT OF DIVERSION, REDUCE THE PLACE OF USE
AND AMENDING THE LICENSE

WHEREAS:

1. License 4479 was issued to L. W. Veerkamp and was filed with the County Recorder of El Dorado County on January 9, 1957.
2. License 4479 was subsequently assigned to Leslie J. and Billie Cross.
3. A request to correct the description of the point of diversion and reduce the place of use under said license has been received by the State Water Resources Control Board.
4. The State Water Resources Control Board has determined that said correction in the description of the point of diversion and the reduction in the place of use will not initiate a new right nor operate to the injury of any other lawful user of the water and that good and sufficient cause has been shown for said correction and reduction.

NOW, THEREFORE, IT IS ORDERED THAT:

The point of diversion and place of use under License 4479 be described as follows:

1. Point of diversion:
North 1,500 feet and West 2,700 feet from SE corner of Section 32, T11N, R10E, MDB&M, being within the NW $\frac{1}{4}$ of SE $\frac{1}{4}$ of said Section 32.
2. Place of Use:

42 acres total
3. The paragraph pertaining to the continuing authority of the Board is replaced with the following:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights privileges under this license are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
